

Application Guide 01 for Rifle Sighting Instrument

NEPS1000 *Advantage*

Features

- Small purge port (M3 mounting)
- Small purge volume 50 cm³
- Purged to < -30°C Dewpoint
- Worldwide operation hot & cold climate regions
- Cyclic purge
- Hygroscopic moisture removal
- Multiple purge option 10 instruments simultaneously
- No desiccation for operational life
- Through purge option

Although the sighting instrument has a small internal volume < 50cm³ the sealing materials used for environmental protection along with the internal construction can contribute significant levels of internal moisture which can readily cause condensation to occur within the instrument.
